

TEAM BTAS MEMBER

Galactic Network Integrators (GNI)

Capabilities:

Galactic Network Integrators, Inc. is a service-disabled veteran-owned small disadvantaged business whose core competencies include program/project management, IT management, software development, administrative support, configuration management, and financial analysis. GNI serves more than 100 commercial and governmental customers at four locations throughout the United States, among them the Air Force Research Laboratory and Air Force Test and Evaluation Center and the University of New Mexico. Their integrated-services approach successfully addresses the technical, cost, schedule, and risk-mitigation elements found in most IT projects.

Point of Contact:

Point of Contact Name	Ruben Navarro
Phone Number	505.280.6727
Email Address	Ruben.Navarro@gni-inc.com

Experience in Service Areas:

Zone	Functional Area	GNI Experience
SOUTHWESTERN ZONE		
Southwest Zone (6)	3.5 System Design Documentation and Technical Data Support	Prepare detailed technical data documentation reflecting latest design, configuration, integration, and installation processes
Southwest Zone (6)	3.6 Software Engineering, Development, Programming, and Network Support	Perform technical analysis, support, and selection of computer hardware and software, or modification to existing computer hardware and software for production systems, or test and training facilities. Our efforts include the software engineering and programming support required to implement software in systems, sub-systems, and components utilizing computer hardware and software.
Southwest Zone (6)	3.7 Reliability, Maintainability, and Availability (RM&A) Support	Ensure system and platform RM&A requirements are integrated with system design, development, and life cycle sustainment. Our support processes ensure design deficiencies and workmanship defects are identified and corrected quickly and effectively
Southwest Zone (6)	3.10 Configuration Management Support	Apply engineering and analytical disciplines to identify, document, and verify the functional performance and physical characteristics of systems, control changes and non-conformance, and track actual configurations of systems

Zone	Functional Area	GNI Experience
Southwest Zone (6)	3.11 Quality Assurance	Apply engineering and analytical disciplines to ensure the processes and products used in the design, development, fabrication, manufacture and installation result in quality products
Southwest Zone (6)	3.16 Logistics Support	Provide technical management associated with acquisition logistics as it applies to the design, development, test, production, fielding, sustainment, and improvement modifications of cost effective systems. Ensured support considerations were an integral part of the system's design requirement, and the system could be effectively supported throughout its life-cycle
Southwest Zone (6)	3.18 Training Support	<p><i>Technical Training Support</i> – Provide adequate instruction and applied exercises necessary to ensure attainment and retention of knowledge, skills, and attitudes regarding systems operated and maintained.</p> <p><i>Professional Development and Training Support</i> – Provide organizational development and process improvement training activities.</p>
Southwest Zone (6)	3.21 Function and Administrative Support	Apply analytical, clerical, organizational assessment, and administrative disciplines require for seamless operation of offices and support functions
