

TEAM BTAS MEMBER

Performance Support, Inc. (PSI)

Capabilities:

Performance Support, Inc. has provided information technology services and professionals since 1985 to DoD nationwide for improving and supporting global information systems. A woman-owned small disadvantaged business, PSI provides cost-effective and affordable IT solutions to commercial and government customers. Its core competencies are information technology A&AS services and support—Microsoft Partner, network and systems administration, systems engineering and management, help desk support, database administration, server administration, and Web server tuning and site management.
